The Logic of Love

Part I: Defining Love, Logic, Freewill, and God

The beginning of wisdom is the definition of terms.
-Socrates

Part I lays a foundation for understanding the terms *love, logic, freewill, and God*. Combing these concepts into a context is the critical issue. The context provides structure for appreciating the meaning of these terms. The last chapter interrelates these concepts to show how proof of God's existence would work to undermine our ability to freely choose love. It shows why we can't have our cake and eat it too. This sets the stage for Part II, an appreciation for the special nature of spiritual faith.
